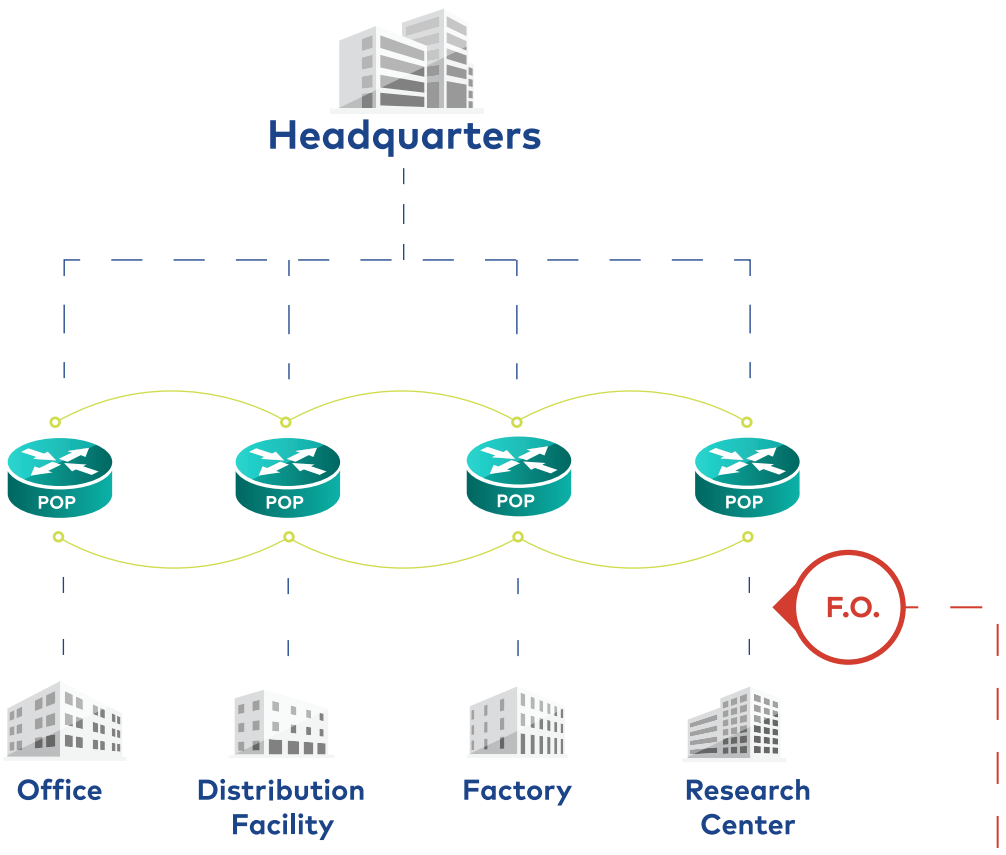
What is a **METRO NETWORK?**

1

Metro Networks allow our customers to virtualize assets and services across multiple factories, office buildings, and research facilities within a city into a single network.

2

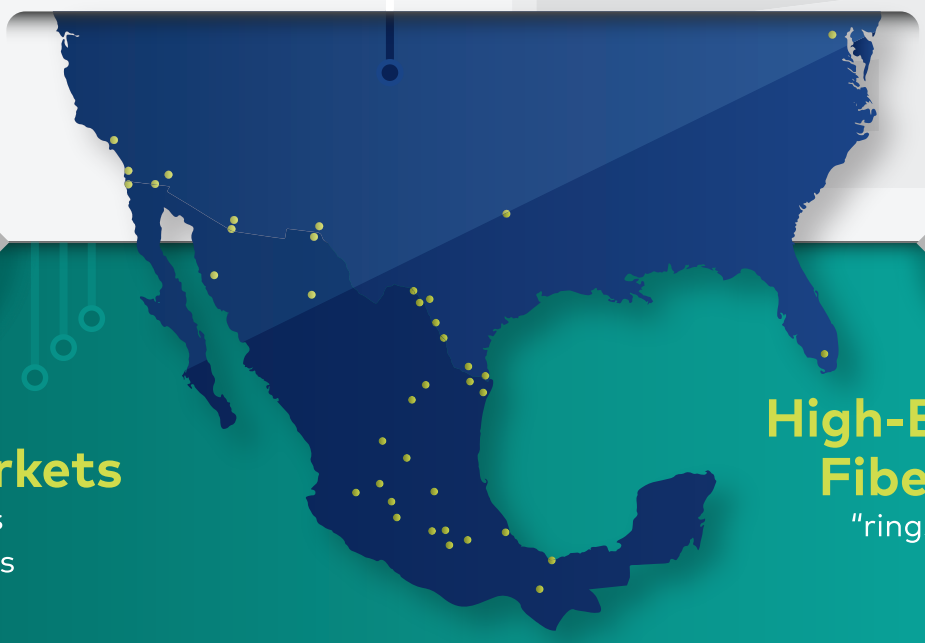


3

Proprietary MESH Multi-point connection technology enables customers to effortlessly manage data storage, cloud service, security and telecoms as a single logical network.

Broad Access

Fast Transfer Speeds



34
Metro Markets
4,735 route miles
2,481 metro miles

High-Bandwidth Fiber Network
"rings" surround most Mexico Cities.

transtelco®
Two Nations. One Network.
